

ENUE: ALLIANCE FRANÇAISE, CHANDIGARH

French is more than a language—it is a gateway to a vibrant culture. To give students an immersive experience, Alliance Française invited the students of classes 6 and 7 for an interactive session that virtually transported them to France.

The highlight of the visit was the Virtual Reality session, where students explored iconic French landmarks such as:

La Seine, La Tour Eiffel, Musée d'Orsay, Le Louvre

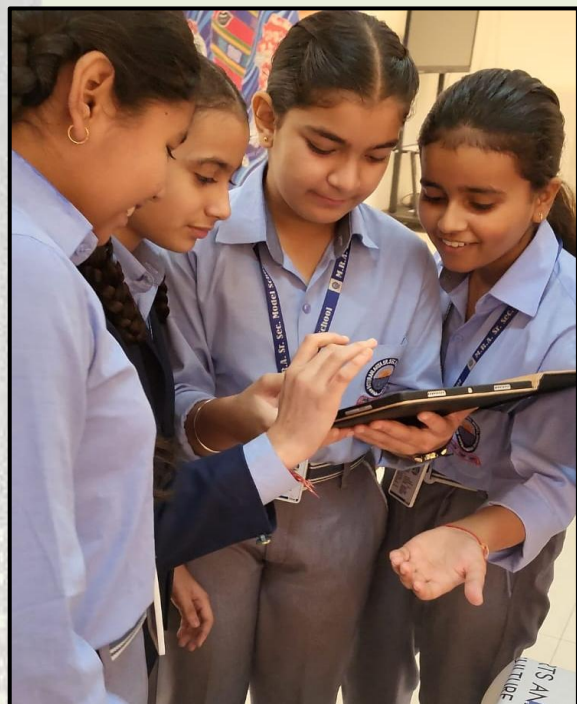

This innovative experience left the students in awe, providing them with an exciting glimpse into French history, architecture, and art.

The students were introduced to cutting-edge exhibits, including Looki Look: An Augmented Reality Exhibition by Aurélien Jeanney.

Francophonie in All Its Forms: An artistic and sound mural showcasing the spirit of Francophonie through augmented reality.

These exhibits combined art and technology, giving the students a modern perspective on French creativity and expression. The students visited the library, where they explored books entirely in French. This exposure encouraged them to embrace the French language and practice their reading skills in a completely immersive environment. The students were also given a glimpse into the diversity of Francophonie, fostering a deeper understanding of the global French-speaking community. The faculty at Alliance Française commended the students for their attentiveness, discipline, and enthusiasm throughout the visit.

We extend our heartfelt thanks to the team at Alliance Française, particularly Madame Fanny, Sarah, and Shilpi, for their warm hospitality and dedication to fostering cultural and linguistic awareness among our students.

This invitation not only provided the students with a profound cultural experience but also encouraged them to develop their linguistic abilities, fostering their journey toward becoming confident bilingual individuals.
